

Healthē[®] CLEANSE[®]

Upper Room Air Sanitization with UVC 222

Healthē CLEANSE[®] safely and silently sanitizes upper room air in occupied spaces, improving air quality with the human-safe, germicidal properties of UVC 222nm light. Evidence from the CDC reinforces that viral transmission occurs through airborne droplets and aerosols which can linger in the air. Rising aerosols encounter the CLEANSE UVC 222 sanitizing rays, mitigating pathogens in real time.

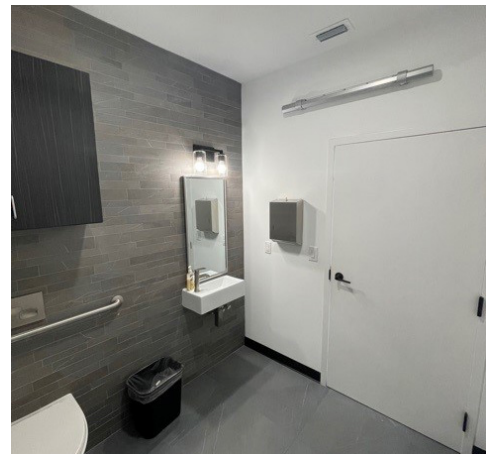

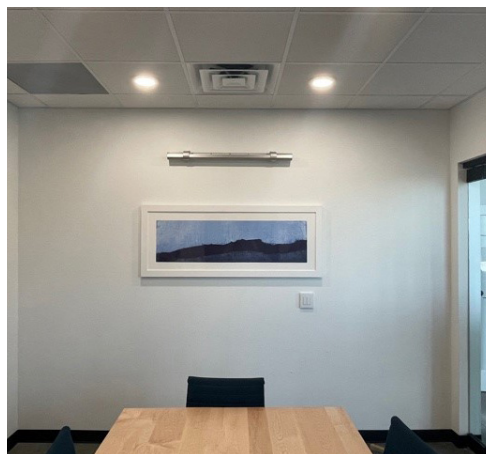

All UVC 222nm light is distributed upwards into the space from the wall or pendant mounted CLEANSE. Use of the

novel, human-safe wavelength of UVC 222nm light provides assurance that occupants are safe even from reflected light. Smart features automate the cleaning and maintenance process, including motion sensor activation and indicating lights for operating mode and lamp replacement.

CLEANSE strengthens the layers of protection for office employees, hotel guests and retail shoppers when installed in elevators, conference rooms, restrooms, and other high-traffic or gathering spaces.

Applications

The CLEANSE was designed to address air quality in small, high-traffic spaces, such as elevators, offices, conference rooms, and restrooms, but may be scaled for larger spaces such as lobbies and waiting rooms. The versatile solution with a compact, linear profile is ideal for use in several sectors including healthcare, commercial real estate, hospitality, education, and transportation.

Specifications All data shown is nominal

Far-UVC Source

Wavelength	222 nm peak wavelength
Type	Excimer lamp
Life	> 10,000 hours

Electrical

Input Voltage	12 VDC with 120-277 VAC 50/60 Hz remote power supply
Power	40 W
Control	ON/OFF via integral motion sensor, APP for initial set-up
Indicator	LED indicator for operation status (Power, UVC 222 ON, lamp life warning, change lamp)

Mechanical

Materials	Extruded aluminum housing, injection molded mounting brackets
Finish	Anodized aluminum, anodized black
Dimensions	40.16 x 3.57 x 2.77 in
Weight	5 lbs
Mounting	Wall, Pendant (accessory kit sold separately)

Application

Environment	Dry location
-------------	--------------

Warranty

Warranty	1 year
----------	--------

SAFETY

Pathogen reduction will vary based on the type of virus or bacteria, distance from the UVC 222 source and time of direct exposure.

The term sanitization is used to indicate a general pathogen reduction and does not reference a specific log reduction as categorized by the U.S. Food and Drug Administration or Environmental Protection Agency.

The Healthe CLEANSE is not currently intended for use as or for medical devices.
